

A technical drawing illustrating a connection method. On the left, there are three vertical rectangular components. The central one is solid black, while the two flanking ones are white with black outlines. A horizontal line representing a screw passes through all three. The screw has a hatched pattern on its shaft where it enters the side plates and a circular head on the right. Two leader lines originate from the assembly: one points from the top-left corner of the black component towards the top-right of the page, and another points from the screw head towards the bottom-right of the page.

Diagrama 1: Escora de madeira (10x10x470cm)

The diagram shows a coordinate system with a horizontal axis and a vertical axis. A line with a positive slope starts from the bottom left and goes towards the top right. A vertical line is drawn, intersecting the sloped line. The vertical line is labeled 'De'.
